Aroma (as appropriate for style) 6 /12
 Comment on malt, hops, esters, and other aromatics
Clove-like phenolics, then bready malt solvent or sulfury aroma was big on right after the pour but goes into the background more as it warms.

Appearance (as appropriate for style) 3 /3
 Comment on color, clarity, and head (retention, color, and texture)
Hazy, pale straw color with a clingy white head that persists well.

Flavor (as appropriate for style) 8 /20
 Comment on malt, hops, fermentation characteristics, balance, finish/aftertaste, and other flavor characteristics
Bready malts and a fruitiness. Not the banana that I would expect, but something orange-y and very sweet. Some clove phenolics and still a bit solventy. A moderate tartness is also present that is too prominent for the style.

Mouthfeel (as appropriate for style) 4 /5
 Comment on body, carbonation, warmth, creaminess, astringency, and other palate sensations
Medium light body with effervescent carbonation. Finishes fairly dry with a nice prickly sensation from the carbonation.

Overall Impression 5 /10
 Comment on overall drinking pleasure associated with entry, give suggestions for improvement
I think you're on the right track with this beer, but the solventy or sulfury character is interfering with the flavor and aroma. My first guess would be a fermentation temperature issue.
